

The Nature 4-H'ers Four Forks

Here is where your journey will start
the Nature 4-H'ers worked with all their heart!
They all helped to make up some fun clues
all of these you will surely use!
Be sure to count all four forks in the trail,
doing this will ensure you don't fail!

1. Start at 220 West Milton Road. Park your car, it won't be far!
2. Use your feet to cross the street.
3. There's a house on your left and on your right, go in the **middle** to see the sight!
4. To be sure that you will not fail, follow a rocky path and slope after you enter the trail.
5. Soon you will come to the first of four forks, follow the clues to know just what to do.
6. You will come to the **first fork** in the road at the hump in the trail, follow to the next step so you will not fail. There is a quad of trees on the right and a brown shed on the left so make sure it is the **left** fork where you are going to inspect.
7. There are rocky roots on this part of the trail, keep following it that way to be sure not to fail.
8. Once you reach the **second of the forks** you will see, look to the right, and a super fat tree there will be. And to the **left** a downed tree you will see. Go that way and on course you will stay.
9. Third fork is what you will be seeking; the excitement is growing and almost peaking!
10. When you are at the **third fork**, you will see a gray shed on the right but go to the **left** to continue your plight.
11. If you have been following our clues, the **last of the four forks** should be in front of you.
12. You will know you are there when you are at the top of a hill and you just might be able to hear a car's grill.
13. There should also be a group of 3 trees in the **center of the fork** in the trail- look in this clump of trees so you do not fail. These trees also all have bumps; they are called BURLS, not humps!
14. At the **fork in the clump of trees**, is exactly where you need to be. Not on the left trail and not on the right trail- if you go on either of these, you are sure to fail.
15. **Under the fallen tree** is where you need to inspect, we hid it nicely, almost perfect!
16. While looking under tree that has fallen down, look **in the middle**, it is almost underground.
17. This is where we buried our treasure, had a lot fun, more than we can measure!
